

CURRICULUM VITAE

The Johns Hopkins University School of Medicine

Cameron F. Parsa, M.D.

January 12, 2008

DEMOGRAPHIC AND PERSONAL INFORMATION

Current Appointment

12/2003 – Present Assistant Professor, Department of Ophthalmology, The Krieger Children's Eye Center, Johns Hopkins University School of Medicine; Active Staff, The Johns Hopkins Hospital, Baltimore, Maryland

Personal Data

Business Address: Wilmer 233
The Johns Hopkins Hospital
600 N. Wolfe Street
Baltimore, MD 21287-9028

Telephone: (410) 955-8314

FAX: (410) 955-0809

E-mail: cparsa@jhmi.edu

EDUCATION AND TRAINING

1977-79 High School; C Section, Lycée Jean Baptiste Say, Paris, France
1979-81 College; Stevens Institute of Technology, N.J.
1981-83 Bachelor of Science in Physics, New York University, WSUC
1983-85 Graduate Physics, New York University, GSAS
1985-88 Medicine, Faculté Libre de Médecine, Lille, France
1990-91 Research Leave of Absence - Johns Hopkins Hospital/National Institutes of Health
1988-91 MD cum laude with Distinction in Research, SUNY/Health Science Center at Brooklyn

POSTGRADUATE TRAINING

1991-92 Intern in Medicine, New York University/Bellevue Hospital, NY
1992-93 First year resident in Ophthalmology, University of Pennsylvania, Scheie Eye Institute, PA
1993-94 Leave of absence/Independent research
1994-96 Resident in Ophthalmology, Louisiana State University in Shreveport, LA
1996-97 Postdoctoral fellowship in Neuro-Ophthalmology (William F. Hoyt, M.D. and Creig S. Hoyt, M.D.), Univ. of California, San Francisco, CA
1997-98 Postdoctoral fellowship in Pediatric Ophthalmology & Strabismus (David L. Guyton, M.D.), Johns Hopkins Hospital, MD

PROFESSIONAL EXPERIENCE

7/1997 – 12/1999	Assistant, Department of Ophthalmology, The Krieger Children's Eye Center, Johns Hopkins University School of Medicine; Active Staff, The Johns Hopkins Hospital and Johns Hopkins Community Physicians Health Centers, Baltimore, Maryland.
11/1998 – 10/1999	Visiting Faculty & Founding Director, Neuro-Ophthalmology Unit, Department of Ophthalmology, Iran University of Medical Sciences; Active Staff, Rasool Akram Medical Center, Tehran, Iran.
1/2000 – 12/2003	Assistant Professor, Department of Ophthalmology, The Johns Hopkins Center for Hereditary Eye Diseases, and The Krieger Children's Eye Center, Johns Hopkins University School of Medicine; Active Staff, The Johns Hopkins Hospital and Johns Hopkins Community Physicians Health Centers, Baltimore, Maryland.
1/2004 – present	Assistant Professor, Department of Ophthalmology, Krieger Children's Eye Center, Johns Hopkins University School of Medicine; Active Staff, The Johns Hopkins Hospital, Baltimore, Maryland.

RESEARCH ACTIVITIES

Publications: *Peer-reviewed articles*

1. Repka MX, Hudak ML, **Parsa CF** & Tielsch JM: Calf-lung surfactant extract prophylaxis and retinopathy of prematurity. *Ophthalmology*, 1992 Apr;99(4):531-6.
2. **Parsa CF**, Temprano J, Wilson D, Green WR: Hemorrhage complicating YAG laser feeder vessel coagulation of cornea vascularization. *Cornea*, 1994 13(3):264-8.
3. Caspi RR, Chan CC, Grubbs BG, Silver PB, Wiggert B, **Parsa CF**, Bahmanyar S, Billau A, Heremans H: Endogenous systemic interferon-gamma has a protective role against ocular autoimmunity in mice. *Journal of Immunology*, 1994 Jan 15;152(2):890-9.
4. Muci-Mendoza R, **Parsa CF**, Hoyt WF: Development of cilioretinal collaterals in a patient with calcific valvular heart disease. *Archives of Ophthalmology*, 1998 Feb. 116(2):255.
5. **Parsa CF**, Grant EP, Dillon Jr, W, du Lac S, Hoyt WF: Absence of the abducens nerve in Duane syndrome verified by magnetic resonance imaging. *American Journal of Ophthalmology*, 1998 March 125(3):399-401.
6. Rubtsova IV, **Parsa CF**, Hoyt WF: Spontaneous regression of a familial optic documentation by serial MR scans over eight years in a boy with probable NF-1. *Vistnik Ophthalmologii*, 1998 May 114(3):48-51.
7. **Parsa CF**, George NDL, Hoyt CS: Pharmacologic reversal of ptosis in a patient with acquired Horner's syndrome and heterochromia. *British Journal of Ophthalmology*, 1998 Sept. 82(9):1095.
8. **Parsa CF**, Muci-Mendoza R, Hoyt WF: AION occurring in a disc with a cup: an exception to the rule. *Journal of Neuro-Ophthalmology*, 1998 Sept. 18(3):169-70.
9. **Parsa CF**, Cheeseman Jr, EW, Maumenee IH: Demonstration of exclusive cilioretinal vascular supply of the retina in Man: vacant discs. *Transactions of the American Ophthalmological Society* 1998; 96:95-106; discussion 106-9.

10. **Parsa CF**, Silva E, Sundin O, Goldberg MF, et al: Redefining papillo-renal syndrome: an under-diagnosed cause of ocular and renal morbidity. *Ophthalmology*, 2001 Apr. 108(4):738-749.
11. **Parsa CF**, Hoyt CS, Lesser RL, Weinstein JM, et al: Spontaneous regression of optic gliomas: 13 cases documented by serial neuroimaging. *Archives of Ophthalmology*, 2001 Apr. 119:516-529.
12. **Parsa CF**, Ellis FJ, Guyton DL: Photographic reproduction of out-of-focus and distorted ocular imagery. *Vision Research*, 2001 June 41(12):1489-1499.
13. **Parsa CF**: Spontaneous venous pulsations should be monitored during glaucoma therapy. *British Journal of Ophthalmology*, 2002 October 86(10):1187.
14. **Parsa CF**. Measuring pseudophakic accommodation. Supplement to *Cataract and Refractive Surgery Today* 2003, March p.29-31. Also republished as Measuring pseudophakic accommodation: an evaluation of available methods, Cover Story, *Cataract and Refractive Surgery Today* 2004; 4(7):50-52 and included again as a book chapter in *CRST's Virtual Textbook of Cataract Surgery. Chapter 11: Accommodating IOLs. July 2004*.
15. Sundin OH, Leppert GS, Silva ED, Yang YM, Dhamaraj S, Maumenee IH, Coutinho Santos L, **Parsa CF**, Traboulsi EI, Broman KW, DiBernardo C, Sunness JS, Toy J, Weinberg EM. Extreme hyperopia is the result of null mutations in *MFRP*, which encodes a Frizzled-related protein. *Proc Natl Acad Sci U S A*. 2005;102:9553-8.

Parsa CF. Papillorenal syndrome and associated *PAX2* mutations. In: Pediatric Ophthalmology/ Strabismus Subspecialty Clinical Update [American Academy of Ophthalmology Web site]. Vol 1; module 6. November 2003. Available at: <http://www.aao.org>.

CD-ROM: ISRS/AAO 2003: Refractive Surgery Comes of Age, American Academy of Ophthalmology 2003 Subspecialty Day, November 14th, 2003, Anaheim, CA.

CD-ROM: 18th Annual Current Concepts in Ophthalmology Meeting, December 2005, Baltimore, MD.

CD-ROM: Clinical Scenarios, Evidence-Based Reviews, and Controversies: a multi-level approach. American Academy of Ophthalmology, in conjunction with the North American Neuro-Ophthalmology Society. Subspecialty Day 2005.

Julia Talsma, **Parsa CF.** Cause of transient monocular visual loss may be difficult to ascertain. Ophthalmology Times, January 2006 (correction published April 15, 2006).

Continuing Medical Education

Photographic simulation of blurred ocular imagery. 52nd Clinical Meeting of Wilmer Residents Association, April, 1993, Baltimore, MD.

Spontaneous regression of a familial optic glioma: documentation by serial MR scans over eight years in a boy with probable NF-1. North American Neuro-Ophthalmology Society, February 1997, Keystone, CO.

Spontaneous regression of nine optic gliomas demonstrated by serial MR imaging. North American Neuro-Ophthalmology Society, March 1998, Orlando, FL.

Spontaneous regression of nine optic gliomas demonstrated by serial MR imaging. 57th Clinical Meeting of Wilmer Residents Association, May 1, 1998, Baltimore, MD.

Brückner’s reflex and the foveal pit: a relationship brought to light. 58th Clinical Meeting of Wilmer Residents Association, April 30, 1999, Baltimore, MD.

Redefining papillo-renal (“renal-coloboma”) syndrome: an under-recognized cause of ocular and renal morbidity? 58th Clinical Meeting of Wilmer Residents Association, May 1, 1999, Baltimore, MD.

Redefining papillo-renal (“renal-coloboma”) syndrome: an under-recognized cause of ocular and renal morbidity? North American Neuro-Ophthalmology Society Meeting, March 2000, Mt. Tremblant, Quebec.

Optic gliomas: new concepts and controversies. 13th Annual Current Concepts Meeting in Ophthalmology, December 9, 2000, Baltimore, MD.

Optic gliomas: new concepts and controversies. 13th Annual Current Concepts Meeting in Ophthalmology, December 9, 2000, Baltimore, MD.

The pupillary exam: basics and beyond. Sixth Annual Continuing Education Course for Ophthalmic Technicians and Medical Personnel, January 20, 2001, Baltimore, MD.

Papillo-renal syndrome: It's in your practice. 60th Meeting of the Wilmer Residents Association, April 28, 2001, Baltimore, MD.

Spontaneous regression of optic gliomas: 13 cases documented by serial neuroimaging. American Society of Neuroradiology, April 23, 2001, Boston, MA.

[Poster] Papillo-renal syndrome: It's in your practice", 5th Meeting of the European Neuro-ophthalmological Society, July 23, 2001, Tübingen, Germany.

Multiple cilioretinal vessels are a sign of renal disease. 14th Annual Current Concepts Meeting in Ophthalmology, December 8, 2001, Baltimore, MD.

Multiple cilioretinal vessels are a sign of renal disease. Current Concepts in Ophthalmology, December 8, 2001, Baltimore, MD.

Behr's syndrome. 14th Annual Current Concepts Meeting in Ophthalmology, December 8, 2001, Baltimore, MD.

Pupillary, neuroimaging and laboratory findings in a patient with Behr's syndrome. 61th Clinical Meeting of Wilmer Residents Association, May 18, 2002, Baltimore, MD.

Delayed onset of bone marrow transplantation retinopathy in the absence of radiation therapy. Current Concepts in Ophthalmology, December 7, 2002, Baltimore, MD.

The dose-response to medial rectus recession is age-dependent. 62nd Clinical Meeting of Wilmer Residents Association, April 26, 2003, Baltimore, MD.

Non-absorbable sutures are superior to absorbable sutures for inferior rectus muscle recessions. 16th Annual Current Concepts in Ophthalmology Meeting, December 4, 2003, Baltimore, MD.

Ocular findings in Down syndrome. 16th Annual Current Concepts in Ophthalmology Meeting, December 6th, 2003, Baltimore, MD.

Medial rectus recessions should be age-adjusted. Annual Meeting of the American Association for Pediatric Ophthalmology and Strabismus, March 31, 2004, Washington, D.C.

Congenital Optic nerve and retinal vascular anomalies in systemic disorders. 63rd Annual Meeting of the Wilmer Residents Association, May 14, 2004, Baltimore, MD.

Methods of measuring accommodation. 63rd Clinical Meeting of the Wilmer Residents Association, May 15, 2004, Baltimore, MD.

Non-absorbable sutures should be used for inferior rectus recessions. 29th Annual Meeting of the European Strabismological Society, June 2004, Izmir, Turkey.

A practical and theoretically optimal surgical approach to Duane syndrome. 17th Annual Current Concepts, December 2, 2004, Baltimore, MD.

Sturge-Weber syndrome and the phacomatoses: Odd man found out. North American Neuro-Ophthalmology Society Meeting, February 17, 2005, Copper Mountain, CO.

Elucidating Sturge-Weber Syndrome pathophysiology-Odd Man Found Out. 64th Clinical Meeting of the Wilmer Residents Association, April 22, 2005, Baltimore, MD.

A practical and theoretically optimal surgical approach to Duane syndrome. Annual Meeting of the American Association of Pediatric Ophthalmology and Strabismus, March 2005, Orlando, FL.

Elucidating Sturge-Weber syndrome pathophysiology: odd man found out. 7th Meeting of the European Neuro-ophthalmological Society, June 29, 2005, Moscow, Russia.

A practical and theoretically optimal surgical approach to Duane syndrome. 7th Meeting of the European Neuro-ophthalmological Society, June 28, 2005, Moscow, Russia.

Sturge-Weber syndrome: Mysteries revealed. 18th Current Concepts in Ophthalmology Meeting, December 1, 2005, Baltimore, MD.

A practical and theoretically optimal surgical approach to Duane syndrome, International Strabismological Society Meeting, February 19, 2006, Sao Paulo, Brazil.

Sturge-Weber, Klippel-Trenaunay and Cobb syndrome. 19th Current Concepts in Ophthalmology Meeting, December 7, 2006, Baltimore, MD.

Study of a large, isolated, unilateral, exophytic optic glioma: lessons to be learned. 19th Current Concepts in Ophthalmology Meeting, December 9, 2006, Baltimore, MD.

Optic disc size and correlation to central corneal thickness: A potential link for susceptibility to glaucoma, Annual Meeting of the North American Neuro-ophthalmology Society, February 12, 2007, Snowbird, Utah.

What is diplopia? 20th Current Concepts in Ophthalmology Meeting, December 7, 2007, Baltimore, MD

CLINICAL ACTIVITIES

Certification

Licensure: Maryland license # D 52004, California medical license # G83711, Pennsylvania medical license # MD 052636L

Boards: Diplomate American Board of Ophthalmology, 1999.

Clinical responsibilities:

1/2000 – 12/2003: Pediatric Ophthalmology, Neuro-Ophthalmology, Ophthalmic Genetics and General Ophthalmology, Clinician, 80% time commitment, provides full salary coverage.

1/2004 – present: Pediatric Ophthalmology and Strabismus, Neuro-Ophthalmology Clinician, 80% time commitment, provides full salary coverage.

Editorial activities

Journal peer review activities (referee 1997 – present, approximately 3 manuscripts overall 10-year average per year)

Archives of Ophthalmology
American Journal of Ophthalmology
British Journal of Ophthalmology
Ophthalmology
Ophthalmic Genetics
Strabismus
Journal of AAPOS
Contemporary Ophthalmology
Digital Journal of Ophthalmology
Central European Science Journals

Professional Societies

Association for Research & Vision in Ophthalmology
North American Neuro-Ophthalmology Society
Wilmer Residents Association

Conference Organizer, Session Chair:

December 2001: Session Chair
“Neuro-ophthalmology”
14th Annual Current Concepts Meeting in Ophthalmology, December 8th, 2001, Baltimore, MD.

June 2003: Session Chair
“Vascular Anomalies of the Optic Nerve”
14th Congress of the European Society of Ophthalmology, June 10, 2003, Madrid, Spain.

February 2005: Session Co-Chair
“Pediatric Neuro-Ophthalmology”
North American Neuro-Ophthalmology Society Annual Meeting, February 17th, 2005, Copper Mountain, Colorado.

Invited talks:

Demonstration of exclusive cilioretinal vascular supply of the retina in Man: vacant discs. American Ophthalmological Society Meeting, May, 1998, Hot Springs, VA.

Absence of the abducens nerve in Duane’s syndrome verified by magnetic resonance imaging. American Association of Certified Orthoptists Eastern Regional Meeting, June 12, 1998, Baltimore, MD.

Redefining papillo-renal (“renal-coloboma”) syndrome: an under-recognized cause of renal failure? Research Seminar, Division of Nephrology, Department of Medicine, The Johns Hopkins Hospital, September 17, 1998, Baltimore, MD.

Redefining papillo-renal (“renal-coloboma”) syndrome: an under-recognized cause of ocular and renal morbidity? 8th Iranian Congress of Ophthalmology, November 26, 1998, Tehran, Iran.

Absence of the abducens nerve in Duane’s syndrome verified by magnetic resonance imaging. 8th Iranian Congress of Ophthalmology, November 26, 1998, Tehran, Iran.

Spontaneous regression of nine optic gliomas demonstrated by serial MR imaging. 8th Iranian Congress of Ophthalmology, November 23, 1998, Tehran, Iran.

Optic gliomas: Natural course, treatment and controversies. Clinical Seminar, Iran Neurosurgical Society, Shariati University Hospital, February, 1999, Tehran, Iran.

Special Lecture. Papillorenal syndrome. Department of Nephrology, Iran University of Medical Sciences, October 1999, Tehran, Iran.

Redefining papillo-renal (“renal-coloboma”) syndrome: an under-recognized cause of ocular and renal morbidity? Yale University Medical Center, Dept. of Ophthalmology, November 22, 1999, New Haven, CT.

Papillorenal syndrome: It’s in your practice. Division of Nephrology, Johns Hopkins Hospital, May 11, 2001, Baltimore, MD.

Spontaneous venous pulsations should be monitored during glaucoma therapy. St. Petersburg Ophthalmological Society, December 14, 2001, St. Petersburg, Russia.

Disc hemorrhages are a sign of disc trauma. St. Petersburg Ophthalmological Society, December 14, 2001, St. Petersburg, Russia.

Papillorenal syndrome. St. Petersburg Ophthalmological Society, December 14, 2001, St. Petersburg, Russia.

Optic nerve sheath meningiomas. 2nd International and 11th Iranian Congress of Ophthalmology, December 18, 2001, Tehran, Iran.

Optic disc and nerve fiber layer analysis. 2nd International and 11th Iranian Congress of Ophthalmology, December 19, 2001, Tehran, Iran.

Spontaneous venous pulsations should be monitored during glaucoma therapy. 2nd International and 11th Iranian Congress of Ophthalmology, December 19, 2001, Tehran, Iran.

Disc hemorrhages are a sign of disc trauma. 2nd International and 11th Iranian Congress of Ophthalmology, December 19, 2001, Tehran, Iran.

Eye findings in Down syndrome. 2002 Down Syndrome Conference, March 23, 2002, Linthicum Heights, MD.

Eye findings in Down syndrome. Ophthalmology for the Pediatrician. Sponsored by Zanvyl Krieger Division of Pediatric Ophthalmology and Strabismus, October 11, 2002, Baltimore, MD.

Cilioretinal vessels and vacant discs: what do they signify? European Society of Ophthalmology, European Society of Ophthalmology, June 10, 2003, Madrid, Spain.

Ocular findings in Down syndrome. Maryland Society of Eye Physicians and Surgeons, and MedChi, the Maryland State Medical Society, October 17, 2003, Columbia, MD.

Ocular manifestations of Down syndrome. Pediatric Ophthalmology: An update for Pediatricians, Family Practitioners, and Other Health Professionals, October 31, 2003, Greater Baltimore Medical Center, Baltimore, MD.

Methods of measuring accommodation and near visual acuity. International Society of Refractive Surgery of the American Academy of Ophthalmology Subspecialty Day Program in Refractive Surgery, November 14, 2003, Anaheim, CA.

Cilioretinal vessels: what do they signify? Guest Speaker, Combined Washington Ophthalmology Programs Grand Rounds, Bethesda Naval Hospital, September 10, 2004, Bethesda, MD.

Methods of measuring accommodation and near visual acuity, 14th Iranian Congress of Ophthalmology, Dec 13, 2004, Tehran, Iran.

New pathophysiologic mechanism for Sturge-Weber Syndrome and implications for its treatment. 2nd International Iranian Congress of Ophthalmology, December 16, 2004, Tehran, Iran.

Cilioretinal vessels, what do they signify?/The phacomatoses: Odd men out/Methods of measuring phakic and pseudophakic accommodation/ A practical and theoretical optimal surgical approach to Duane syndrome/ Spontaneous regression of optic gliomas/Ocular findings in Down's syndrome, Kasimpasa Naval Hospital, January 3rd, 2005, Istanbul, Turkey.

New pathophysiologic mechanism for Sturge-Weber Syndrome/Methods of measuring accommodation and near visual acuity/Practical and theoretically optimal surgical approach to Duane syndrome. Hacettepe University, January 3rd, 2005, Ankara, Turkey.

Sturge-Weber syndrome and the phacomatoses-odd man found out. North American Neuro-Ophthalmology Society Meeting, Pediatric Neuro-Ophthalmology symposium, February 17, 2005, Copper Mountain, Colorado.

Elucidating Sturge-Weber syndrome pathophysiology: Odd man found out. Guest speaker Ophthalmology Grand Rounds, Columbia University Medical Center, March 31, 2005, New York, New York.

Topics in Pediatric Neuro-ophthalmology, Pediatric Neurology Grand Rounds, Johns Hopkins University School of Medicine, April 13, 2005, Baltimore, MD

New views on Sturge-Weber syndrome, Paediatric Ophthalmology, Great Ormond Street Hospital, Changing Lives: Children's Eye Group Meeting and David Taylor's Retirement Symposium, May 15, 2005, London, England.

New pathophysiologic mechanism for Sturge-Weber Syndrome/Methods of measuring accommodation/Practical and theoretically optimal surgical approach to Duane syndrome/Cilioretinal vessels: what do they signify? 25th Anniversary Symposium of Establishment of Neuro-ophthalmology Unit in Vargas Hospital, May 20-21, 2005, Caracas, Venezuela.

Transient monocular visual loss. American Academy of Ophthalmology Subspecialty Day Program in Neuro-ophthalmology, October 15, 2005, Chicago, Illinois.

Keynote lecturer. Sturge-Weber syndrome. Århus University Hospital, 6th Sandberg Course in Pediatric Ophthalmology, November 19, 2005, Sandberg Estates, Sonderburg, Denmark.

Sturge-Weber syndrome. Annual Congress of the Neurosurgical Society of Iran, November 24, 2005, Shiraz, Iran.

Visiting Professor. New pathophysiologic mechanism for Sturge-Weber Syndrome/Methods of measuring accommodation and near visual acuity/Cilioretinal vessels, what do they signify?/A practical and theoretical optimal surgical approach to Duane syndrome/ Spontaneous regression of optic gliomas/Ocular findings in Down's syndrome, Bombay City Eye Institute and Research Center, January 8th, 2006, Bombay, India.

The role of weight loss in intracranial hypertension, World Congress of Ophthalmology Meeting, February 21, 2006, San Paulo, Brazil.

Keynote lecturer. La pathophysiologie du syndrome de Duane: les implications des nouvelles images d'IRM et une nouvelle approche chirurgicale. Association Francaise de Strabologie, May 8, 2006, Paris, France.

Duane syndrome pathophysiology: the implications of new MR imaging and a new surgical approach to treatment. American Association of Certified Orthoptists Combined Regional Meeting, June 10, 2006, Baltimore, MD.
